DIPTANSHU MAHISH

Product Engineer · Frontend Engineer · Design Engineer

Bengaluru, India | +91 8961603453 | diptanshumahish2016@gmail.com | diptanshumahish.in | linkedin.com/in/diptanshumahish | github.com/diptanshumahish

SUMMARY

Product Engineer with 2+ years shipping customer-facing web and mobile products from 0→1, including a founding-engineer role at a revenue-generating AI SaaS startup and an OTT platform that reached 1,000+ MAU in its first month. Comfortable owning a feature end-to-end, product decisions, UI/UX, architecture, and deployment, across React, React Native, Flutter, TypeScript, and Firebase. Also builds independently: founder of Bitgrain (browser design tool, 10k+ monthly visitors) and three self-published mobile apps.

EXPERIENCE

SDE II · Founding Engineer at Supaboard.ai , *Jul 2025 – Present*

Full-time · Bengaluru, India

- Joined as a founding engineer and built the AI SaaS platform from early-stage development to production, owning core product and engineering decisions for a team that grew to 12 people.
- Built and shipped customer-facing AI-powered analytics workflows, translating ambiguous user requirements into scalable product experiences used daily by paying customers.
- Owned end-to-end feature development, architecture, implementation, testing, deployment, and iteration, across the core dashboard and agent product.
- Partnered with product and design to resolve ambiguous technical challenges and accelerate release velocity.

Founding Engineer at Catchmflix Pvt Ltd (AiNethra), *May 2024 – Jun 2025*

Remote, full-time

- Delivered a complete OTT platform across web and mobile, owning application architecture, UI/UX, and core streaming workflows from scratch.
- Built custom HLS-based video playback for web and mobile, integrating streaming, authentication, and content-delivery systems.
- Took the product to 1,000+ MAU within its first month of launch.
- Contributed to product strategy and roadmap decisions alongside founders.

Graphic Designer at Tahska India, *Apr 2025 – Feb 2026*

Remote, part-time

- Designed brand campaigns and visual assets that improved brand presence across digital channels.
- Redesigned the company website, improving organic traffic by 30%.
- Managed social media channels and content planning to grow the customer base.

Frontend Engineer at Fyipen Pvt Ltd, *Apr 2023 – Sep 2024*

Remote internship

- Worked hands-on with production-grade codebases for multiple external clients.
- Built production-grade web applications using TypeScript and Next.js, contributing to scalable frontend architecture and client-facing features.

Graphic Designer at Reset, *Dec 2023 – Mar 2024*

Remote internship

- Created 500+ digital assets and social media creatives for multiple brands, improving visual consistency across marketing channels.
- Planned and developed social posts and reels that increased reach for end customers.

PROJECTS

Bitgrain (bitgrain.app) *2025 – Present*

- Founded and built a browser-based creative platform for deterministic visual effects (dithering, halftone, grain) as a Figma/Canva alternative with no AI.
- Owned product strategy, UX, engineering, and deployment solo; launched on Product Hunt and reached 100+ MAU and 10,000+ monthly site visitors, converting 500+ signups.

Independent Mobile Apps, dailyThings, Zen Clock/Pomodoro, Simply Expenses, *2023 – 2024*

- Designed, built, and published three consumer Android apps solo, covering daily-planning, focus-timer, and expense-tracking use cases.

Rustybase, *2025 – Present*

- Experimental database project exploring storage engines, query systems, and backend architecture concepts.

Warriors Group LLC (Client Project), *2023 – 2024*

- Designed and developed the client's website and companion app, plus 5+ landing pages for sub-brands.
